

Executive Snapshot

Niharika, this mock shows a **notable step-up from your DP-900 sessions** — especially in **demo confidence and tool familiarity (Power BI)**. However, from an MCT lens, you are still operating at “guided delivery level,” not independent batch ownership.

Top 3 Changes That Will Elevate You Fastest

1. **Critical:** Fix repetition and uncontrolled speech loops
2. **Major:** Strengthen conceptual framing before demos (don't jump directly)
3. **Major:** Improve visual communication (narration + readability + audience anchoring)

Line-of-Delivery Review

1) Opening (0:08 – 0:40)

What You Did

- Started directly with module explanation
- Skipped structured introduction
- No audience anchoring

Issue

Critical — *Missing trainer identity and session framing*

Why It Matters

In enterprise delivery → trainer credibility is established in first 20–30 seconds

Trainer Rewrite

“Good morning everyone... (pause, confident tone)

Welcome to PL-300 Module 3 — Enhancing Reports in Power BI.

I'm Niharika, and today I'll help you understand how to make reports not just functional... but truly user-friendly and interactive.”

Micro-Coaching

Never skip introduction — it sets **authority + trust + structure**

2) Agenda & Learning Objectives

What You Did

- Repeated “we are going to learn...” multiple times
- Covered topics but with redundancy

Issue

Major — Repetition-heavy delivery

Why It Matters

Repetition reduces perceived maturity → sounds unstructured

Trainer Rewrite

“By the end of this module... (lower tone)

you'll be able to design intuitive navigation, apply conditional formatting, and choose visuals that communicate insights effectively.”

Micro-Coaching

Replace repetition with **outcome-driven statements**

3) First Concept — Sorting Visuals

What You Did

- Jumped quickly into Power BI demo
- Explained steps clearly
- Minimal conceptual framing

Issue

Major — Missing “why before how”

Why It Matters

Intermediate learners need context before execution

Trainer Rewrite

“Before we sort visuals... (pause)

ask yourself — why do we sort?

To highlight patterns — like top-performing regions or lowest sales areas... now let's see how Power BI enables that.”

Micro-Coaching

Always follow → Context → Action

4) Demonstration — Sorting

What You Did

- Step-by-step explanation clear
- Slight repetition in phrasing
- Good tool navigation

Issue

Minor — Verbal redundancy

Trainer Rewrite

“Click the ellipsis icon... (pause)

choose ‘Sort by’ ... select ‘Sales’ ... and set ascending — notice how the smallest values move to the top.”

Micro-Coaching

Use short, crisp instructional commands

5) Formatting Visuals

What You Did

- Demonstrated formatting options well
- Over-explained minor UI elements
- Repeated “we can do formatting...”

Issue

Major — Cognitive overload + repetition

Why It Matters

Too many UI details → learner fatigue

Trainer Rewrite

“Formatting controls how your insight is perceived... (pause)

for example — changing font or color can shift focus instantly.”

Micro-Coaching

Explain impact, not just features

6) Conditional Formatting (Strong Segment)

What You Did

- Clear business example (highest/lowest sales)
- Demonstrated rules + gradients + icons
- Good visual explanation

Issue

Minor — Explanation loops + slight confusion in thresholds

Trainer Rewrite

“Instead of scanning numbers... (raise energy)

we let visuals tell the story — darker color means higher sales, lighter means lower.”

Micro-Coaching

Anchor concept → “visual insight replaces manual analysis”

7) Learner Question — Icons vs Colors (17:39)

What You Did

- Answered correctly
- Demonstrated icon rules
- Slight hesitation in defining ranges

Issue

Major — Lack of confident threshold definition

Why It Matters

Uncertainty reduces trust

Trainer Rewrite

“Let’s define clear thresholds... (pause)

0–30 lakh → red... 30–50 → yellow... above 50 → green... now your visual communicates instantly.”

Micro-Coaching

Predefine thresholds → avoid thinking live

8) Tooltips (Visual & Page)

What You Did

- Explained clearly
- Demonstrated both types
- Wasted time creating new page (flow break)

Issue

Major — Time inefficiency + flow break

Trainer Rewrite

“A tooltip adds context without clutter... (pause)

hover → see deeper insight... no extra clicks needed.”

Micro-Coaching

Optimize demo → avoid unnecessary setup

9) Buttons & Navigation

What You Did

- Explained navigation buttons clearly
- Good real-world example (MS Learn link)

Issue

Minor — Slight over-explanation

Trainer Rewrite

“Buttons make reports behave like apps... (raise energy)

click → navigate → explore — no confusion for the user.”

Micro-Coaching

Focus on **experience**, not mechanics

10) Transitions

What You Did

- “Moving to next slide” repeatedly

Issue

Major — Slide-driven delivery

Trainer Rewrite

“Now that we’ve improved visuals... let’s enhance interaction...”

Micro-Coaching

Use concept transitions, not slide transitions

11) Closing

What You Did

- No recap
- No learner validation

Issue

Major — Weak closure

Trainer Rewrite

“Quick check... (pause)

sorting, formatting, and conditional visuals — clear so far?

Let’s build on this in the next module.”

Micro-Coaching

Always end with **recap + engagement**

Quantitative Analysis

- Filler Density: ~10–12 / 100 words
- Engagement Rate: ~1 check-in / 10 min
- Avg Utterance Length: Long
- Explanation vs Engagement: 85% vs 15%
- Concept Accuracy: ~85%
- Definition Precision: ~75%

Weighted Scoring

Category	Score	Weight	Result
Content Accuracy	4	20%	16
Demo Handling	4	15%	12
Classroom Intelligence	3	15%	9
Structure	3	10%	6
Pacing & Voice	3	10%	6
Question Handling	3	10%	6
Presence	3	10%	6
Vocabulary Precision	3	10%	6

Batch Readiness Score: 67%

Traffic Light

● Red — Not Ready for Delivery (Close to Yellow)

Top Gaps & Fixes

1. *Missing structured opening*

- Impact: Authority drop
- Drill: 5 intro rehearsals daily

2. Repetition loops

- Impact: Cognitive fatigue
- Drill: 2-min no-repetition explanation

3. Jumping to demo

- Impact: Concept disconnect
- Drill: Always say “why first”

4. Weak transitions

- Impact: Flow breaks
- Drill: Practice concept linking

5. Visual readability issues

- Impact: Learner confusion
- Drill: Design + readability checks

Resources & Drills

- Microsoft Learn: PL-300 Learning Path
- Power BI Visual Design Guidelines

Micro Drills

- 90-sec explanation (no filler)
- Demo narration with “why + impact”
- Conditional formatting explanation twice daily

Batch Readiness Estimate

- Shadow Ready: **10–12 hours (2–3 days)**
- Solo Ready: **20–25 hours (4–5 days)**

Feedback Summary (Manager Record)

- Strengths: Strong demo control, improved confidence
- Weaknesses: Repetition, weak framing, missing intro
- Behaviour: Coachable, improving
- Risk: Delivery maturity still developing

Manager Remarks

Niharika, this is your **best mock so far** — especially from a delivery confidence perspective. You are now clearly comfortable with tools and demonstrations.

However, MCT-level readiness is not just about “knowing and showing” — it is about **controlling the narrative, managing learners, and structuring thinking**.

Manager Verdict

- Delivery Maturity: Improving
- Conceptual Stability: Good

- Classroom Handling: Moderate
- Learner Impact: Moderate–Good

Rating: Satisfactory

Decision: $\triangle$ Needs Moderate Improvement
